Profile

Front-end, full-stack and Android developer with hands-on experience building responsive websites, MERN applications, Java Spring Boot projects, and Android solutions. Skilled in React, JavaScript, Kotlin, REST APIs, database integration, deployment, and user-focused development.

Experience

Moolstone **02/2026 – Present**
Founder & Web Developer *www.moolstone.com*
- Founded and launched Moolstone, providing e-commerce seller services and web development solutions for businesses.
- Designed, developed, hosted, and deployed the official company website end-to-end, including responsive UI, domain setup, and production deployment.
- Provide seller support for Amazon, Flipkart, and Meesho, including onboarding, catalog management, SEO keywords, ads support, and account health.

Mphasis **2021/10 – 2022/11**
Associate Software Engineer *Bangalore, India*
- Acquired proficiency in HTML, CSS, and JavaScript while developing a front-end website called Grow as part of a training project.
- Applied front-end technologies to create a functional and visually appealing website.

Projects

Saatvik Buildhomes – Real Estate Website **Live Project**
Real Estate Web Application
Tech Stack: React.js | Next.js | TypeScript | JavaScript | CSS
- Developed a responsive real estate website for Saatvik Buildhomes, showcasing residential projects and services.
- Created J.K. Enclave property showcases with apartment details, amenities, image galleries, and project information.
- Implemented an interactive home loan EMI calculator and customer enquiry options.

News App **Live Project**
Full-Stack MERN Web Application
Tech Stack: React.js | Node.js | Express.js | MongoDB | Redux Toolkit | JWT | Mongoose | Vite | Render | Netlify | MongoDB Atlas
- Developed a full-stack MERN news application with a React frontend and Node.js/Express.js backend.
- Built RESTful APIs for news articles with MongoDB and Mongoose for persistent data management.
- Created an admin panel supporting news CRUD operations and secure access with JWT authentication.
- Used Redux Toolkit for state management; deployed with Render, Netlify, and MongoDB Atlas.

Autonomous Robot Fleet Manager **Live Project**
Warehouse Robot Fleet Management & Simulation System
Tech Stack: Java 21 | Spring Boot | Spring Data JPA | PostgreSQL | REST APIs | HTML | CSS | JavaScript | SVG
- Developed a warehouse robot fleet management simulation using Java, Spring Boot, and PostgreSQL to manage AGVs.
- Implemented RESTful APIs for robot registration, battery monitoring, status updates, and mission management.
- Integrated Dijkstra·s shortest-path algorithm for robot navigation across warehouse stations.
- Designed priority-based task dispatching and resource scheduling with station/corridor locking to avoid collisions.
- Implemented deadlock detection and dynamic rerouting to manage conflicting robot movements.
- Built an interactive dashboard for warehouse visualization, robot tracking, and mission monitoring.

Naseeb Lal Market Rent Manager **GitHub**
Android Rent Management Application
Tech Stack: Kotlin | Jetpack Compose | Firebase Realtime Database
- Developed an Android rent-management app for commercial shops and residential flats, tracking tenants, rent, dues, and joining dates.
- Implemented separate shop and flat workflows and electricity charge calculation from meter readings and per-unit pricing.
- Integrated Firebase Realtime Database to synchronize tenant, rent, dues, and payment records.

React Blog **Live Project**
React Blog App
Tech Stack: HTML | CSS | JavaScript | React
- Designed a responsive blog UI in React, using Context API for global state and content sharing across components.

Live Weather **Live Project**
Live Weather App
Tech Stack: HTML | CSS | JavaScript | React
- Created a responsive React weather interface with Axios for fetching and displaying weather data.

Todo List Website **Live Project**
Todo App
Tech Stack: HTML | CSS | JavaScript
- Built an interactive JavaScript-based to-do application using DOM manipulation and maintainable client-side code.

Skills

Languages & Web: Java, Kotlin, JavaScript, TypeScript, C, HTML, CSS
Frameworks & UI: Spring Boot, React, Next.js, Node.js, Express.js, Jetpack Compose, Redux Toolkit
Database & Cloud: PostgreSQL, MongoDB, MongoDB Atlas, Firebase Realtime Database
Technologies: REST APIs, Spring Data JPA, Hibernate, JWT, Android Development, Responsive Web Development
Tools: Git, GitHub, Vite, Netlify, Render, JUnit 5, Mockito

Education

Prepbytes — Full-Stack Development 2023/03 – 2023/09
Don Bosco Institute of Technology, Bengaluru — B.E. (Computer Science and Engineering) 2017/08 – 2021/08

Interests

• Cooking • Cricket • Listening Music
